Modernization Engine for Lifecycle Integration

A safe, secure IBM i focused modern development ecosystem

What Issues does Merlin Help Solve

Modern / Centralized Source Control and Branching

Modern RPG

```
ctl-opt bnddir('ACCRCV');
dcl-f custfile usage(*update);
dcl-ds custDs likerec(custRec);
dcl-f report printer;

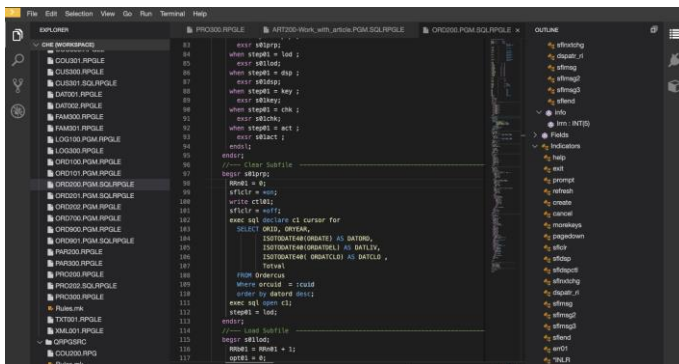

read custfile custDs;
dow not %eof;
  if dueDate > %date(); // overdue?
    sendOverdueNotice();
  write reportFmt;
  exec sql insert :name, :duedate into
    mylib/myfile;
```

- Fixed to Free
- Refactoring

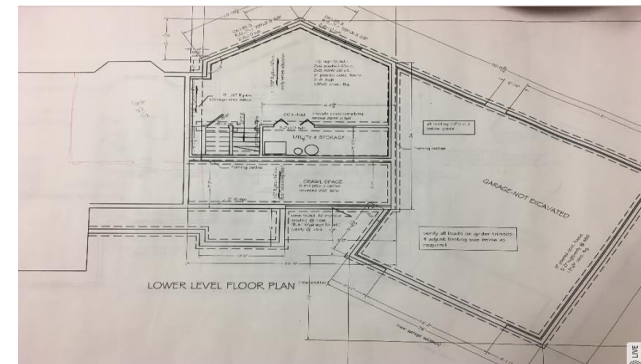

Browser Centric VsCode Based IDE

- Outline View
- Tokenization
- Content Assist
- Code formatting
- Understand Languages
 - RPG
 - SQL
 - Embedded SQL
 - CL
 - Cobol
 - DDS

Application Blueprint

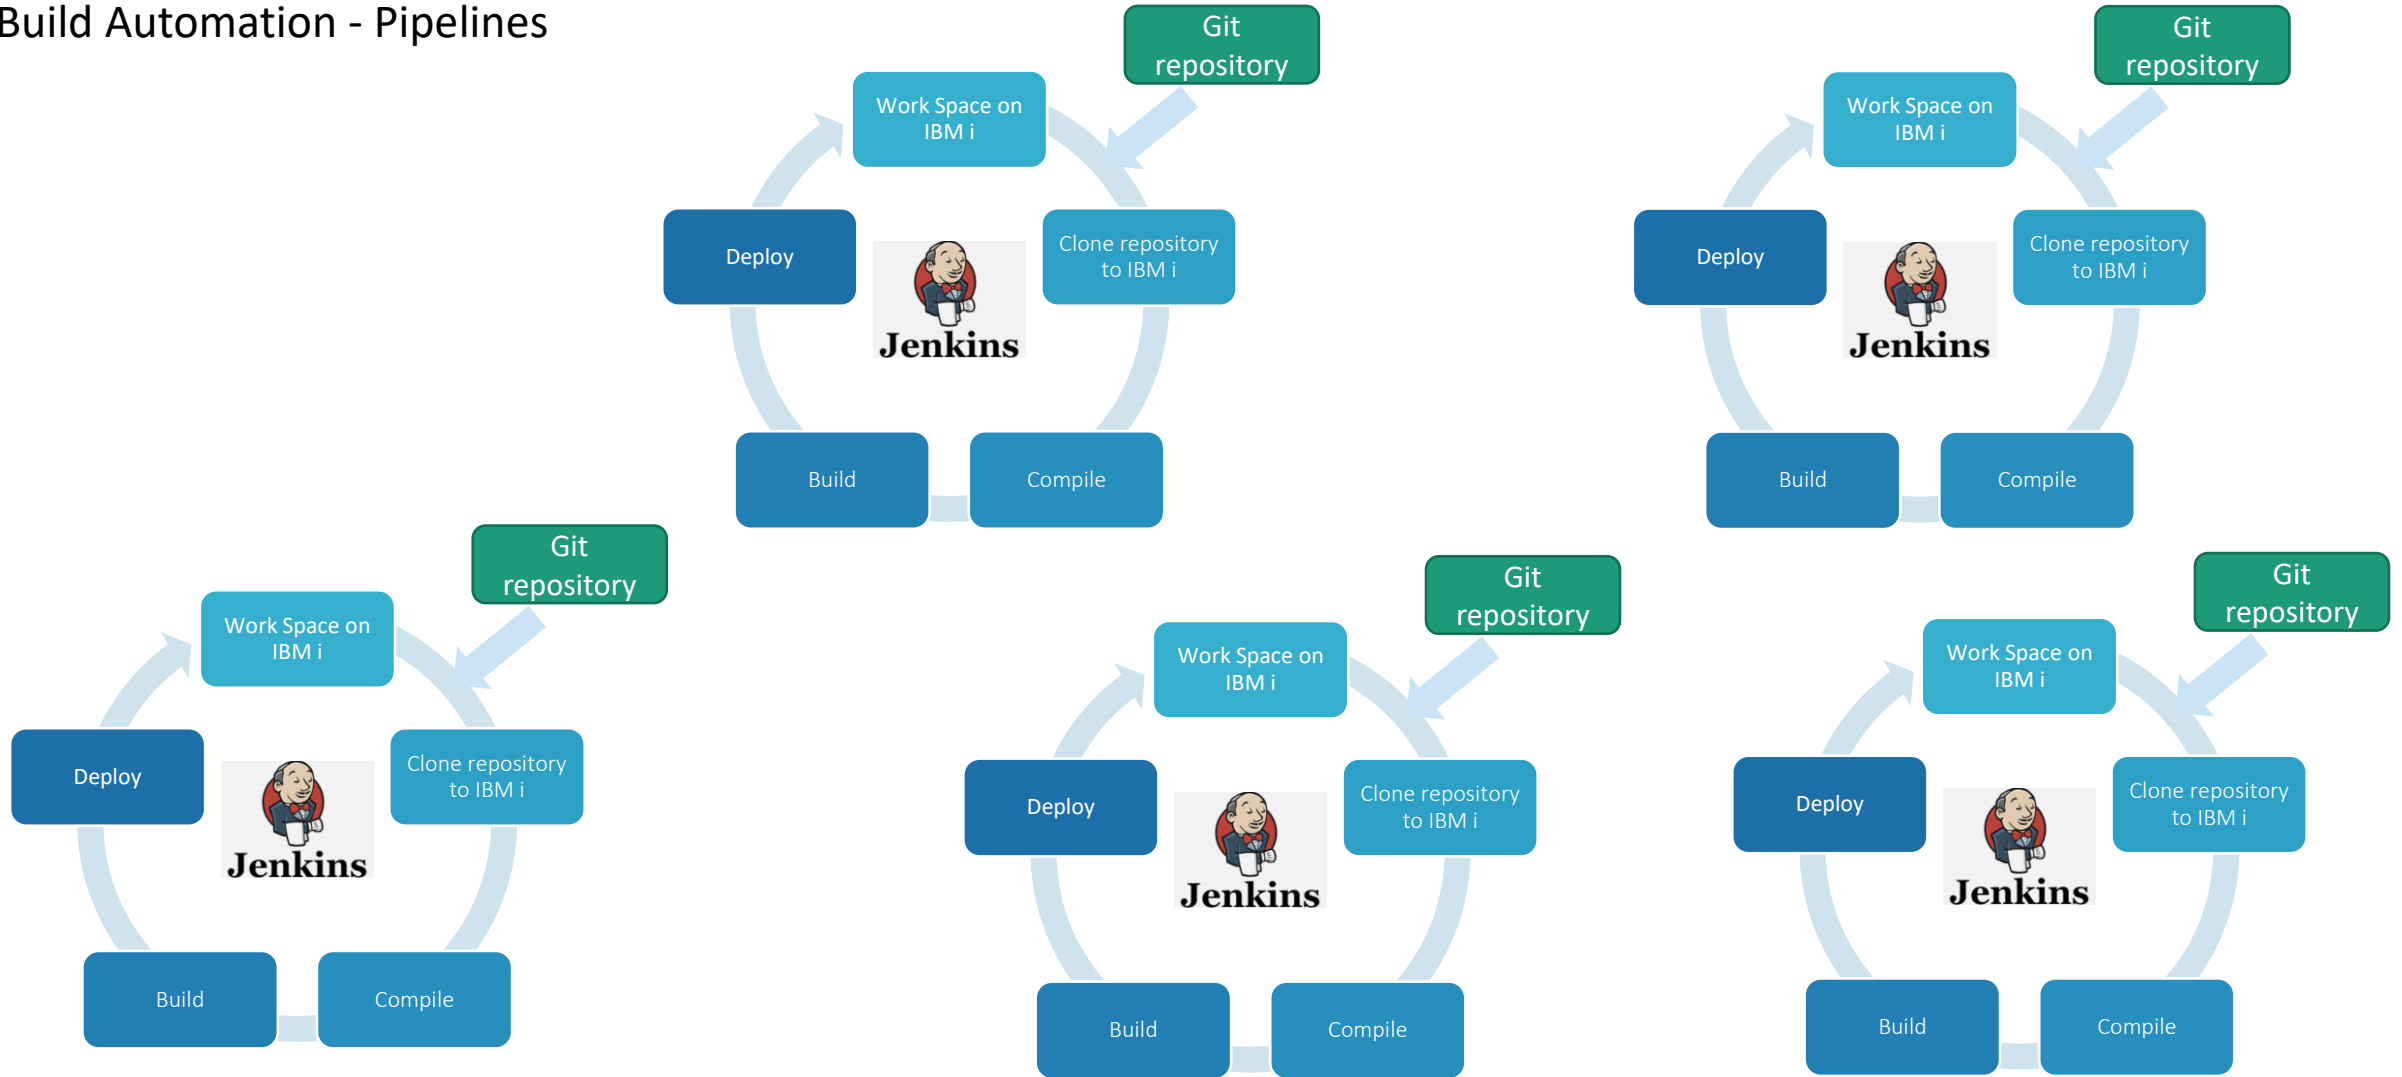

- Impact Analysis
- Program Understanding
- Data Usage
- Pgm Flow

What Issues does Merlin Help Solve

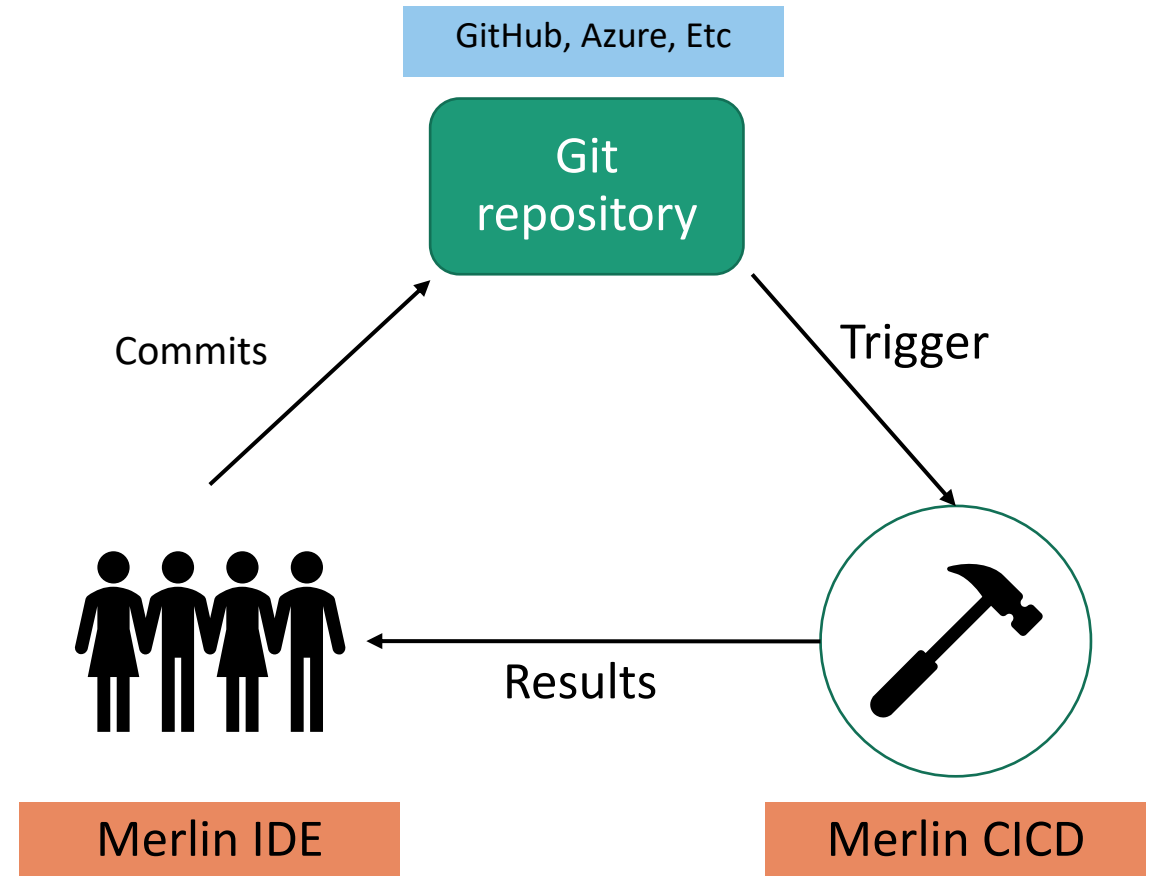

Build Automation - Pipelines

What is continuous integration?

- Developers commit code to a shared repository regularly
- Repository pushes cause a build to trigger automatically
- Immediate feedback based on build result

Why do I need CI?

Detect problems or bugs,
as early as possible,
in the development life cycle

Potential bugs and errors are
caught earlier in the life cycle
which results in better quality
software

CI is a mindset

Fixing broken builds should be treated as a high priority issue for all team members

The deployment process should be automated, with no manual steps involved

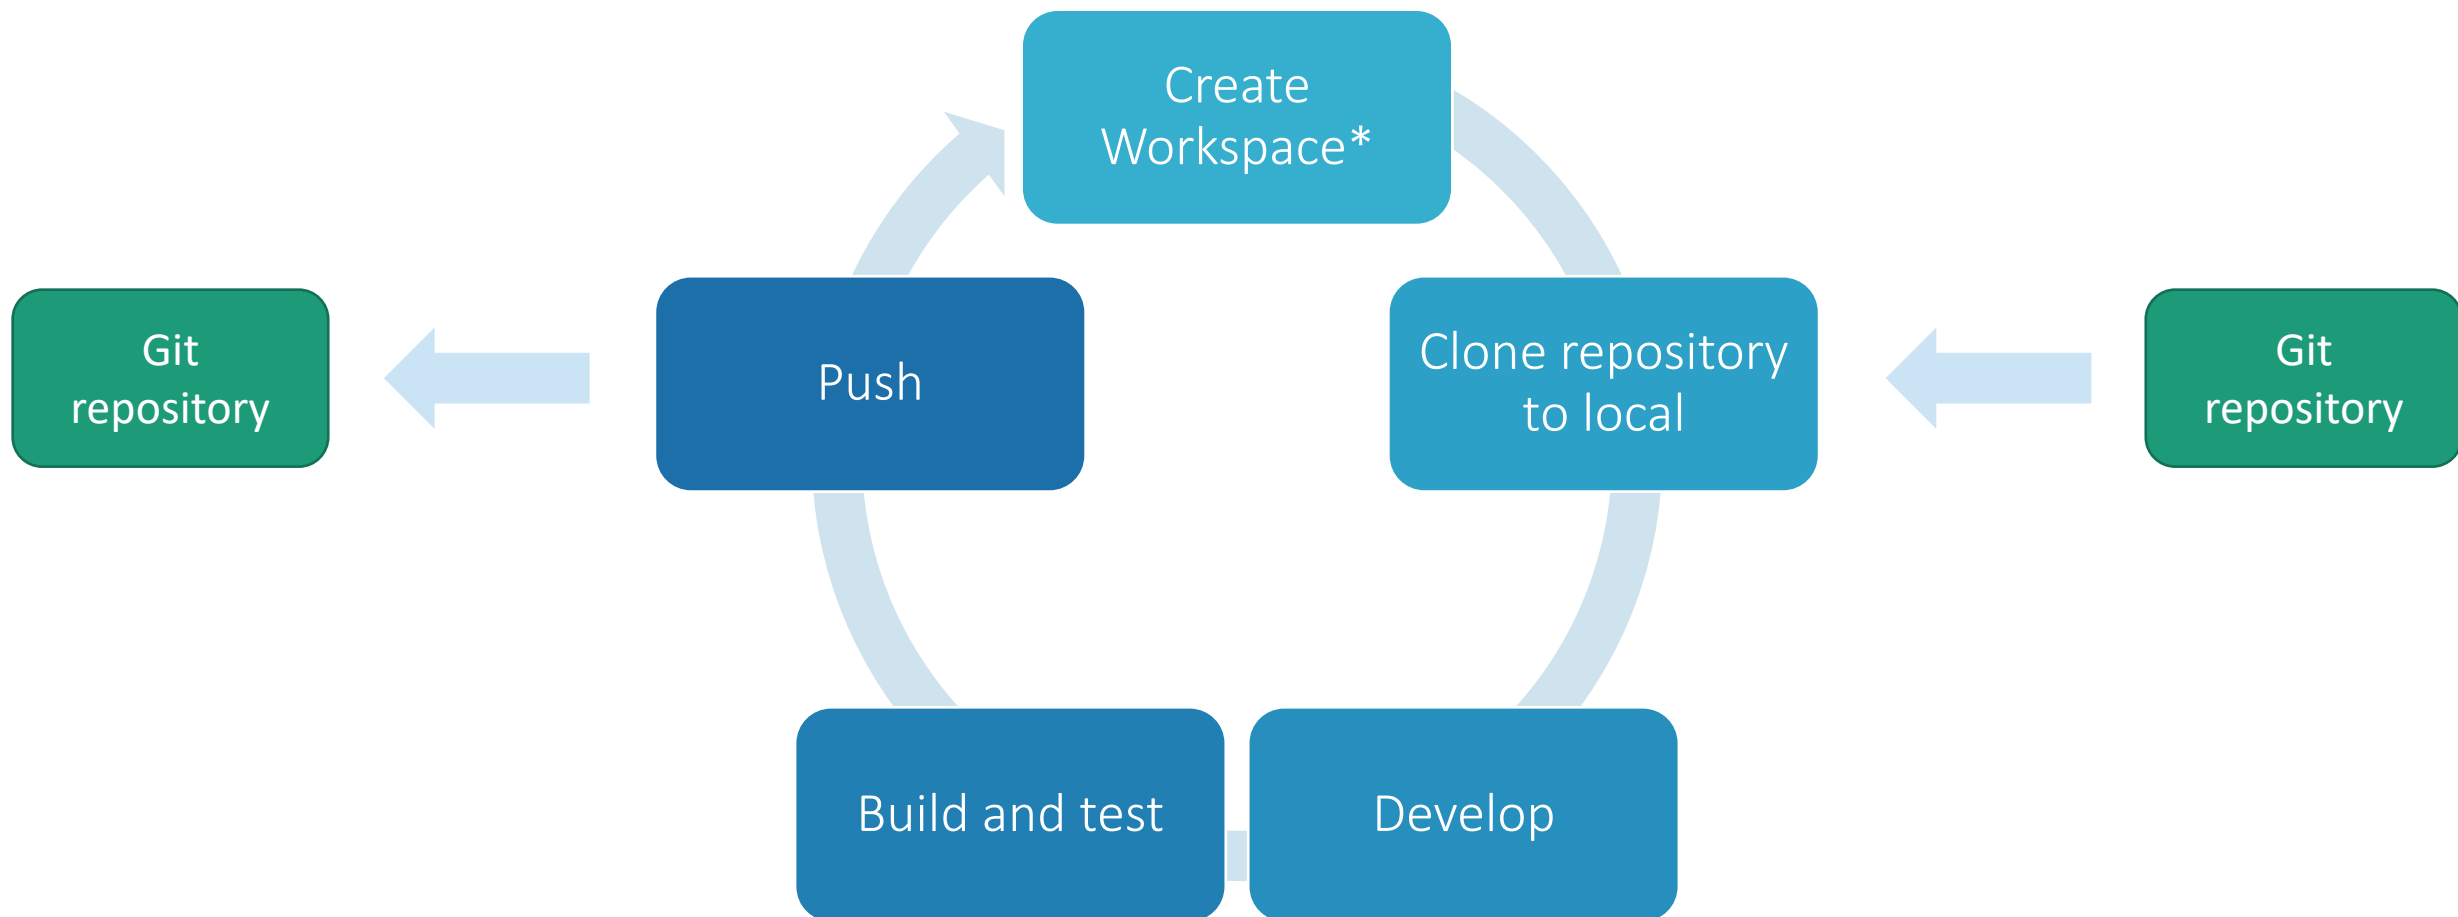

Merlin Hierarchy

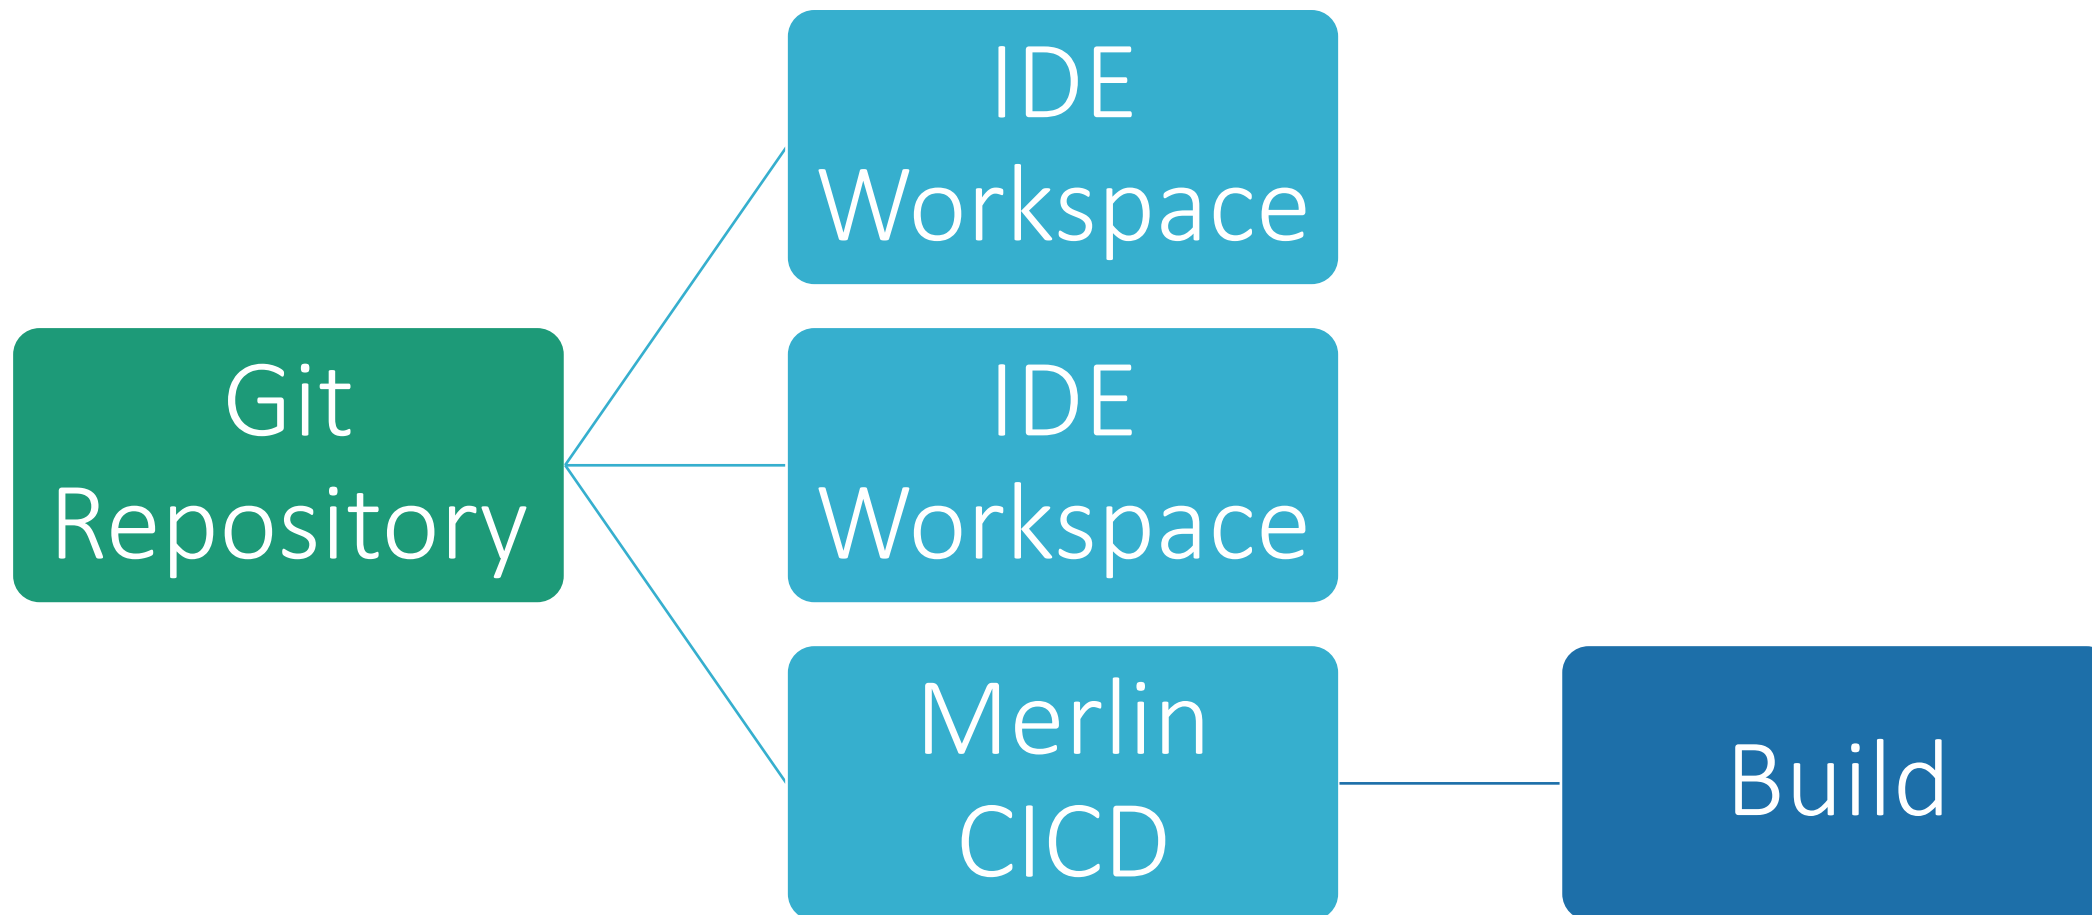

Development flow

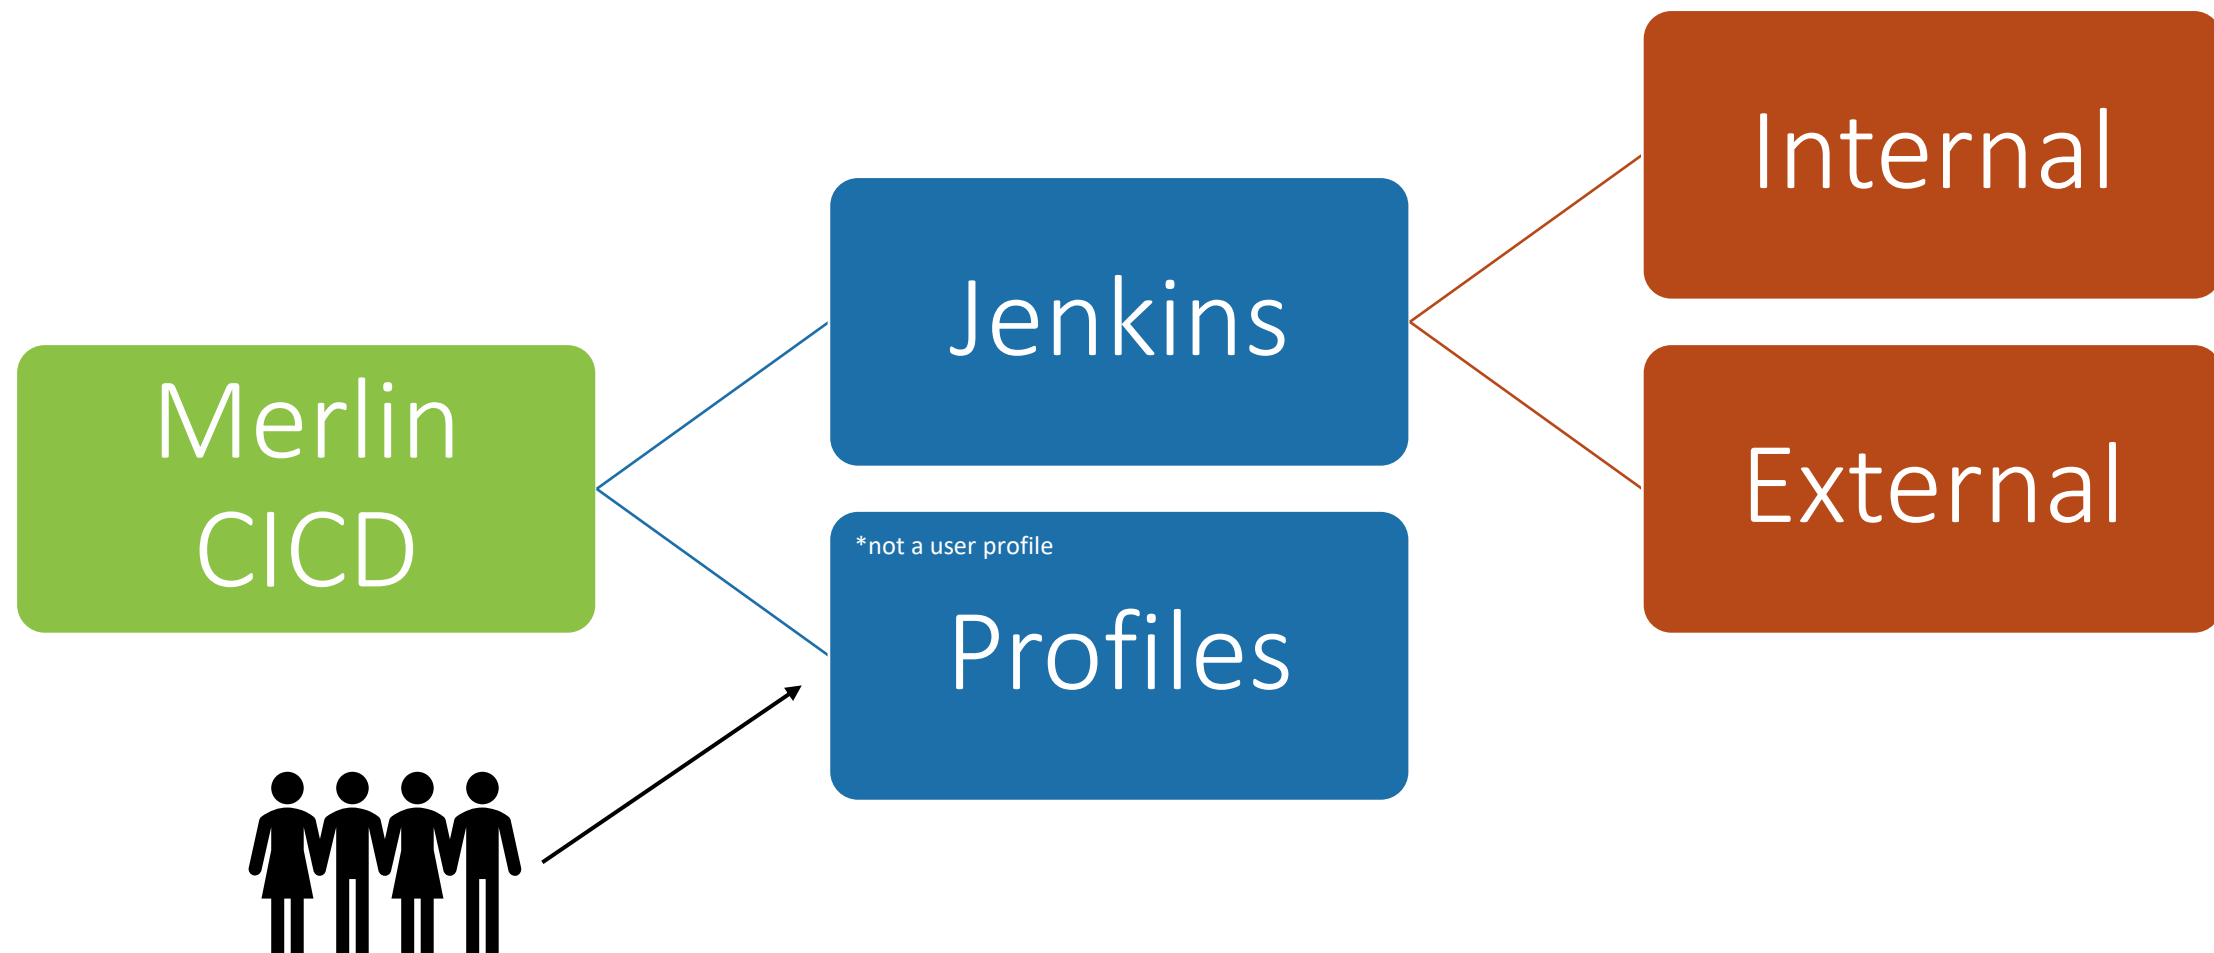

Git repo usage

Merlin CICD hierarchy

Types of 'builds'

Build

Compile

- Build of entire application, or
 - Build of specific portion of application (e.g. a display file and any dependent programs)
- Compilation of a specific sources without the need of launching larger build

Any build tool

- **ARCAD Builder**
- Custom build tools
- GNU Make
- ibmi-bob

Integrated into Merlin

- ARCAD Builder
- ARCAD Transformer RPG (fixed->fully free)
- ARCAD Observer (Xref visualization/metadata)

ARCAD Builder

- Automatically detects projects dependency tree
- Highly optimized smart builds and minimal clones
- Integrated into Jenkins, Merlin IDE and Merlin CICD

Lets go Build
Something

Profile (example B)

Special notices

This document was developed for IBM offerings in the United States as of the date of publication. IBM may not make these offerings available in other countries, and the information is subject to change without notice. Consult your local IBM business contact for information on the IBM offerings available in your area.

Information in this document concerning non-IBM products was obtained from the suppliers of these products or other public sources. Questions on the capabilities of non-IBM products should be addressed to the suppliers of those products.

IBM may have patents or pending patent applications covering subject matter in this document. The furnishing of this document does not give you any license to these patents. Send license inquires, in writing, to IBM Director of Licensing, IBM Corporation, New Castle Drive, Armonk, NY 10504-1785 USA.

All statements regarding IBM future direction and intent are subject to change or withdrawal without notice, and represent goals and objectives only.

The information contained in this document has not been submitted to any formal IBM test and is provided "AS IS" with no warranties or guarantees either expressed or implied.

All examples cited or described in this document are presented as illustrations of the manner in which some IBM products can be used and the results that may be achieved. Actual environmental costs and performance characteristics will vary depending on individual client configurations and conditions.

IBM Global Financing offerings are provided through IBM Credit Corporation in the United States and other IBM subsidiaries and divisions worldwide to qualified commercial and government clients. Rates are based on a client's credit rating, financing terms, offering type, equipment type and options, and may vary by country. Other restrictions may apply. Rates and offerings are subject to change, extension or withdrawal without notice.

IBM is not responsible for printing errors in this document that result in pricing or information inaccuracies.

All prices shown are IBM's United States suggested list prices and are subject to change without notice; reseller prices may vary.

IBM hardware products are manufactured from new parts, or new and serviceable used parts. Regardless, our warranty terms apply.

Any performance data contained in this document was determined in a controlled environment. Actual results may vary significantly and are dependent on many factors including system hardware configuration and software design and configuration. Some measurements quoted in this document may have been made on development-level systems. There is no guarantee these measurements will be the same on generally-available systems. Some measurements quoted in this document may have been estimated through extrapolation. Users of this document should verify the applicable data for their specific environment.
